...films such as

The

Lord

of

the

Rings

h_p^ℓ

target: $i = 3$ tokens still unread

Readout 1: Patchscopes

Repeat this: $[h_p^\ell]$

"of the Rings"

Readout 2: generation

...films such as The Lord

"of the Rings"

success = the target string appears in the output (case-insensitive, budget $i + 3$ tokens)

Patchscopes asks what the vector contains; generation asks what the model does with it.
